PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) with hands-on experience developing scalable full-stack applications using React, Next.js, Java Spring Boot, Node.js, and TypeScript. Skilled in RESTful API development, authentication systems, and database-driven applications with strong software engineering fundamentals. Passionate about building secure, high-performance applications and solving real-world problems through modern technologies.

EDUCATION

Bachelor of Engineering in Computer Engineering

2022 – 2026

A.I.K.T.C. – School of Engineering, Navi Mumbai

CGPA: 7.95

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, Elysia.js, FastAPI

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Authentication: JWT, OAuth, Spring Security

Tools: Git, GitHub, Prisma, Firebase, Vercel

Core: OOP, REST APIs, Data Structures, API Design

PROJECTS

OpenRouter – Multi-Provider AI Gateway Platform

Turborepo — Elysia.js — TypeScript — Neon DB — Prisma

- Developed a scalable AI gateway integrating multiple LLM providers using OpenRouter APIs.
- Implemented secure request handling, authentication, and rate limiting.
- Designed backend architecture with PostgreSQL and Prisma for efficient data management.
- Built a dashboard for API monitoring and performance analytics.

Chatbot Pro – Multi-Tenant SaaS Platform

Next.js — TypeScript — Firebase

- Developed a multi-tenant chatbot platform with secure authentication.
- Built real-time communication features and analytics dashboard.
- Implemented tenant-level data isolation and user management.

Medium Clone – Blogging Platform

React — TypeScript — PostgreSQL — Hono — JWT

- Developed a blogging platform with JWT authentication and protected routes.
- Designed REST APIs and database integration for content management.
- Implemented secure user-generated content workflows.

FinTrack – Personal Finance Management Platform

React — Spring Boot — Java — MySQL — Spring Security — JWT

- Developed a full-stack finance management platform for tracking expenses and transactions.
- Built secure REST APIs using JWT authentication and Spring Security.
- Implemented financial analytics dashboard with interactive charts.
- Applied layered architecture and user-specific access control.

Perplexity AI – AI Search Platform

React — Bun — TypeScript — Supabase — OpenRouter — Tavily

- Built an AI-powered search platform integrating real-time web search with LLM responses.
- Implemented streaming AI conversations and persistent chat history.
- Added OAuth authentication and contextual follow-up interactions.
- Designed scalable backend architecture for optimized performance.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Spring Framework for Java Development – Coursera
- Object-Oriented Programming in Java – IBM
- Java Data Structures for Beginners – Great Learning
