[Portfolio](#) — [GitHub](#) — [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Developer with experience building full-stack applications using **React**, **Next.js**, **Spring Boot**, **Node.js**, and **TypeScript**. Skilled in developing scalable software, REST APIs, and database-driven applications.

EDUCATION

Bachelor of Engineering in Computer Engineering

2022 – 2026

A.I.K.T.C. – School of Engineering, Navi Mumbai

CGPA: 7.95

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, Elysia.js, FastAPI

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase

Authentication: JWT, OAuth, Spring Security

Tools: Git, GitHub, Prisma, Firebase, Vercel, Supabase

Core: OOP, REST APIs, Data Structures, API Design

PROJECTS

OpenRouter – Multi-Provider AI Gateway Platform

Turborepo — Elysia.js — TypeScript — PostgreSQL — Prisma — OpenRouter

- Developed a scalable AI gateway platform integrating multiple Large Language Model (LLM) providers through OpenRouter APIs.
- Designed and implemented secure REST APIs with authentication, request validation, and rate-limiting mechanisms.
- Built a centralized dashboard for API key management, usage monitoring, and performance analytics.
- Utilized PostgreSQL and Prisma ORM for efficient data modeling, query optimization, and transaction management.
- Structured the application using a monorepo architecture with Turborepo to improve maintainability and code sharing.

Chatbot Pro – Multi-Tenant SaaS Platform

Next.js — TypeScript — Firebase

- Developed a multi-tenant SaaS chatbot platform allowing multiple organizations to manage independent chatbot instances.
- Implemented secure authentication, user management, and tenant-level data isolation.
- Built real-time messaging capabilities and chatbot interaction workflows.
- Developed an analytics dashboard for monitoring chatbot performance and user engagement metrics.
- Leveraged Firebase services for authentication, database management, and cloud hosting.

Medium Clone – Blogging Platform

React — TypeScript — PostgreSQL — Hono — JWT

- Developed a full-stack blogging platform enabling users to create, publish, edit, and manage articles.
- Implemented JWT-based authentication and protected routes for secure access control.
- Designed RESTful APIs using Hono for content management and user operations.
- Integrated PostgreSQL for persistent storage of users, articles, and application data.
- Applied responsive UI design principles to provide a seamless reading and writing experience.

Perplexity AI – AI Search Platform

React — Bun — TypeScript — Supabase — OpenRouter — Tavily

- Built an AI-powered search platform combining real-time web search and LLM-generated responses.
- Implemented streaming AI responses, persistent chat history, and follow-up interactions.
- Integrated Supabase authentication and designed a scalable backend architecture.

FinTrack – Personal Finance Management Platform

React — Spring Boot — Java — MySQL — Spring Security — JWT

- Developed a personal finance management platform using React, Spring Boot, and MySQL.
- Built secure REST APIs with Spring Security and JWT authentication.
- Created analytics dashboards and implemented user-specific access control.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Spring Framework for Java Development – Coursera
- Object-Oriented Programming in Java – IBM
- Java Data Structures for Beginners – Great Learning
