Education

Anjuman-I-Islam Khalsekar Technical Campus – School of Engineering Navi Mumbai
Bachelor of Engineering in Computer Engineering 2022–2026
CGPA: 8.18

Open Source Contributions

Pupitre — Docker Security Hardening View PR
- Improved Docker security by addressing KICS scan findings, adding non-root users and health checks, and reducing unnecessary runtime dependencies.

BFUR64 — Java Style Refactoring View PR
- Replaced `HashSet` with `LinkedHashSet` to ensure deterministic iteration order and consistent Java code behavior.

Technical Skills

Languages: Java, TypeScript, JavaScript, Python, SQL, HCL, YAML, Shell Scripting

Backend: Spring Boot, Node.js, Express.js, FastAPI, Hono, Elysia.js

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Vite

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma, Spring Data JPA, Hibernate

DevOps & Cloud: Docker, Kubernetes, Terraform, Ansible, Jenkins, AWS, GitHub Actions, Git, GitHub, Render, Vercel

Platforms: Firebase, Supabase

Core Concepts: REST APIs, WebSockets, JWT, OAuth, OOP, Data Structures

Projects

CloudFleet – Fleet Management & Geofencing Platform

React • TypeScript • Spring Boot • MySQL • WebSocket • AWS

- Designed and developed **Spring Boot REST APIs** for vehicle management, geofencing, and event-driven entry/exit notifications.
- Implemented secure authentication and authorization using **JWT**, **Spring Security**, JPA/Hibernate, and MySQL.
- Built real-time alert delivery using **WebSockets** and deployed backend services on **AWS EC2** with **RDS**, **S3**, and **IAM**.

AI Router – Multi-Provider AI Gateway Platform

TypeScript • Elysia.js • PostgreSQL • Prisma • OpenRouter

- Designed a centralized **AI gateway** for routing requests to multiple LLM models through a unified REST API.
- Implemented **authentication**, API-key management, request validation, and **rate limiting** to secure and control API traffic.
- Designed PostgreSQL schemas and optimized data access using **Prisma ORM** for usage tracking, request history, and analytics.

MAZI – Collaborative Scheduling Platform

Next.js • React • TypeScript • Prisma • PostgreSQL • Supabase

- Designed backend APIs for shared calendar creation, PIN-based access, availability management, and collaborative scheduling.
- Implemented availability-overlap detection to calculate mutually available meeting windows across multiple participants.
- Used **Prisma** and **PostgreSQL** for relational data modeling with Next.js Route Handlers for server-side business logic.

Chat-Bot-Pro – Multi-Tenant AI Chatbot Platform

Next.js • TypeScript • Firebase • Groq API • Tailwind CSS

- Designed a **multi-tenant SaaS architecture** with secure authentication and tenant-level data isolation.
- Integrated the **Groq API** for real-time LLM-powered conversations and managed chatbot conversation state.
- Implemented backend workflows for chatbot configuration, user management, usage tracking, and analytics.

Logistics REST API - CI/CD & AWS Deployment

Java • Spring Boot • Docker • Jenkins • Terraform • Ansible • AWS EC2 • RDS • S3

- Containerized a Spring Boot logistics application using Docker and Docker Compose with MySQL networking and persistent storage.
- Built a Jenkins CI/CD pipeline to automate Maven builds, Docker image creation, and application deployment.
- Provisioned AWS infrastructure using Terraform and automated EC2 configuration with Ansible, integrating RDS and S3 services.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Spring Framework for Java Development – Coursera
- Object-Oriented Programming in Java – IBM
- Kubernetes for Absolute Beginners – KodeKloud
- Docker for Absolute Beginners – KodeKloud
- System Design for Beginners – KodeKloud
